Decred Stake Pool

Overview

A stake pool is used to delegate your voting powers to a third party (the pool). The pool **cannot** steal your funds.

Participating in a stake pool is perfect for people who wish to take part in Decred's proof of stake voting but can't due to:

- Not wanting to keep a constantly unlocked wallet
- Lack of a reliable/low latency Internet connection

The source code for this project will be posted at a later date on [GitHub](#).

Pool Information

Network: mainnet
Pool Fees: 7.5%
Support Email: admin@stakeminer.com

Download

A list of stakepools and their websites can be found at the bottom of the They charge a small fee (5% or less) to be used.

The pool API key can be found in the settings page on their website 5) Go to the Tickets tab located within the Decredition wallet.. This may take some time It will do so automatically in the background 3) Send your DCR to your wallet.. Recommended wallets are Decredition or the Command-Line wallet Your wallet will need time to sync itself to the latest block.. Funds will show up if the wallet is synced to the latest block (sometimes a restart is required).. 4) Pick a stakepool and sign up on the pool's website Copy the API key they will provide to you.
